## **1. Introduction**

### **1.1. Preface**

Research Strategy 2019-2024 of 'Haxhi Zeka' University (UHZ) of Peja aims at reflecting the vision and important objectives that need to be met in response to contemporary challenges that require durable solutions, and meeting the ever-increasing demands of various stakeholders for new knowledge based on scientific research. Through this Strategy, we will add up efforts to place scientific research at the heart of all UHZ academic activity. Also through this Strategy, we aim to enhance our activities as an institution, which not only creates and promotes new knowledge, but also makes significant contribution to key social, economic and environmental challenges facing the country, the region and beyond. This cannot be done without a clear strategy, with the right people, the right resources, and an understanding of the environment in which we operate. As research within UHZ should contribute to solving different challenges, it means that the values, fundamental principles of academic freedom and priorities of strategic importance should be linked to UHZ Strategic Plan 2017-2022.

### **1.2. UHZ in retrospective**

Establishment of "Haxhi Zeka" University in Peja as a research and scientific educational institution, which awards diplomas and degrees up to doctorate level is based on the Constitution of the Republic of Kosovo, in accordance with Article 145 (point 2), taking into account Articles 4, 21, 22 of Law no. 03/L189 on the State Administration of the Republic of Kosovo.

UHZ in Peja was founded in 2011, a successor of Peja Higher School of Economics which was founded in 1960, and later transformed into the Business School in 2001, and then in the Faculty of Applied Business Sciences (FSHAB) in 2004.

UHZ in Peja is the second largest public university in Kosovo including 5 faculties such as: Faculty of Business; Law Faculty; Faculty of Management in Tourism, Hospitality and Environment; Faculty of Agribusiness and Faculty of Arts.

Currently UHZ University in Peja has 15 accredited Bachelor and 5 Master programs, while teaching is organized in 4 facilities used for the smooth running of the teaching process. During the 2011/12 period, the number of students enrolled at UHZ in Peja was 1161, with 9 full-time professors and 25 professors from abroad, increasing to approximately 14,000 in 2018, with a total of 40 full-time professors and 30 professors from outside UHZ.

International Cooperation of UHZ in Peja is very active and involved in 6 Tempus and Erasmus + projects so far, with mobility of academic staff and students for 8 consecutive years in England, Slovenia, Sweden, Northern Ireland, Italy, Bulgaria, Germany, Austria, and other countries participating in various mobility programs.

UHZ in Peja also has cooperation agreements with over 30 universities and other local and international research institutions, aiming at creating joint study programs, exchange of professors and students, publishing textbooks, journals and organizing joint conferences-symposiums. In the past years, UHZ has organized a significant number of local and international scientific conferences where our students and students from the region have presented their research papers.

It should be noted that UHZ made the necessary preparations for the establishment of scientific-research institutes and other research centers titled 'From theory to practice', and is a member of European Network for Academic Integrity (ENAI). UHZ in Peja has two libraries with a total of 2678 titles from the fields of study at UHZ.

In terms of scientific research, UHZ and its academic staff are renowned for their scientific research activity by publishing artistic works in international journals, various monographs in national journals and a considerable number of university textbooks. Presentations of scientific papers developed by academic staff and UHZ students have been delivered at national and international conferences.

## **2. Vision and Mission**

### **2.1. Vision**

UHZ aims to be renowned institution in the country and the region in scientific and artistic research related to market demands and business needs contributing to the overall development of local and international society.

### **2.2. Mission**

Create new knowledge through scientific research based on international research standards and developing innovative applied ideas to meet the needs of society.

Apply top standards for undergraduate and postgraduate education in response to market needs and new challenges of contemporary society.

Recruit the best students and professors in interdisciplinary fields in the implementation of university research strategy.

Transparent provision of lifelong learning opportunities for academic staff and scientific researchers implying diversity and gender in the university

## **3. Purpose and Objectives**

The purpose of the UHZ research strategy is to consolidate and strengthen its position at all levels, increasing scientific research by 30% from its current level in the next 5 years, and promote an open intellectual environment in which the development of scientific research is based on innovation, knowledge and ethics and aims to solve the complex problems and issues facing contemporary society.

These strategic goals are followed by a series of actions; some of the actions incorporate programs and activities which are at an early stage, others are continuations and expansions of current initiatives, including new plans. All of these initiatives are intended to ensure and advance our impact on scientific research.

UHZ for the period 2019-2024 will be dedicated to meeting these 5 key objectives of the research strategy:

- Enhance and develop scientific-research activity
- Create and develop research programs
- Establish international cooperation in the field of scientific and artistic research
- Create a sustainable infrastructure environment in the field of research
- Financial support to scientific research

### **3.1 Objective 1. Enhance and develop scientific-research activity**

Strengthen and develop the link between research, education and the wider society through various initiatives. Scope of UHZ research will cover a broad interdisciplinary reach, and research outputs will contribute to social development, which often requires an approach beyond national borders. Understanding the complex elements and forces within nature and society requires examination from multi-disciplinary perspective. The main challenges of society can rarely be addressed using findings with only one research discipline. Multi-disciplinary approach creates synergy and provides opportunity to develop creative ideas.

UHZ research is also important for society and preparations for social challenges facing the local, regional, national and global levels will also be made.

3.1.1. Functionalize and advance scientific and artistic research activity

3.1.2. Create and profile scientific journals within UHZ

3.1.3. Establish and functionalize research institutes within UHZ

3.1.4. Establish “science parks” to include institutes, consultancy centers, special laboratories for scientific research and a food processing workshop

3.1.5. Support academic staff in participation, publication and joint artistic and research projects at international level

3.1.6. Engage students in research projects

### **3.2 Objective 2. Create and develop research programs**

Balance existing capabilities with potential and opportunities; optimum use of current resources. The University will continue developing its range of research fields working on multidisciplinary research. These will be carefully selected priority research fields where UHZ has special advantage, or where leadership wants to develop special advantage as part of the institution’s strategic positioning.

3.2.1 Establish the doctoral program

3.2.2 Develop study programs based on research results

3.2.3 Include research ethics as research concept

3.2.4 Advance the office for academic and career development

3.2.5 Develop doctoral course

3.2.6 Develop courses for quality publications in international journals indexed in the most popular databases such as: Thomson Reuters, Scopus, EBSCO etc. and advance research activity

### **3.3. Objective 3. Establish international cooperation in the field of scientific and artistic research**

An increasingly important dimension of our Strategy will be collaborations and partnerships, with other researchers and with a broader community of research funders and sponsors. This will build strong research networks and infrastructure with the ability to address major issues and generate new knowledge and knowledge.

Research collaborations of this nature present strategic opportunities to improve the degree, quality, and impact of our research. There are many benefits of collaborative partnerships where researchers are exposed to different perspectives. They also bring much needed complementary skills from different sources and infrastructures and may provide access to industry-specific expertise. They further provide opportunities for additional or diversified sources of funding.

Strategic partnerships with international scholars can bring global recognition to the university and benefits for teaching and research programs.

The research strategy through this objective aims to address the following issues:

- 3.3.1. Enhance cooperation in joint projects
- 3.3.2. Establish and implement joint programs with other universities
- 3.3.3. Increase involvement of staff and students in mobility programs
- 3.3.4. Student support (internship, follow-up studies, etc.).
- 3.3.5. Organize international multidisciplinary conferences
- 3.3.6. Organize summer school
- 3.3.7. Cooperation with external stakeholders (institutes, consultation centers, businesses) equipped with infrastructure such as laboratories, equipment for standardization etc., for studies and research of common interest.

#### **3.4 Objective 4. Create a sustainable infrastructure environment in the field of research**

Academic units and research institutes rely on accurate and reliable research information to carry out strategic planning, manage the research process, and improve reporting to external bodies such as funders and government bodies. Good governance and a management system is a critical success factor in intense research development of a university.

Good access to research infrastructure such as research facilities, high performance, automatization, libraries, computer clusters, extensive databases, etc., is not only a prerequisite for effective individual research but it also creates the conditions for enhanced collaboration with different actors in society.

The research strategy through this objective aims to address the following issues:

- 3.4.1. Promote ethics in scientific research (Anti-plagiarism Software)
- 3.4.2. Provide software for scientific research needs (SPSS, STATA, LISREL, M-FIT, NVIVO)
- 3.4.3. Access to online databases, libraries and music libraries
- 3.4.4. Develop a database for recording all individual and group publications - professor/student within UHZ
- 3.4.5. Establish physical infrastructure

#### **3.5 Objective 5. Financial support to scientific research**

The demand for financial resources is increasing, and the chances for funding are increasingly getting complicated. It is therefore essential that financial and budget systems are optimal and transparent regarding such requirements. To optimize our research success, our budget model must be synchronized in order to enable research activity at the top level. This includes regular check-up of the model to ensure that we are minimizing obstacles to research, or eliminating behaviors that are prejudicial to research activity.

In order to enhance the research effort at the University, it will be essential to diversify the funding base, seeking more international funding.

The research strategy through this objective aims to address the following issues:

- 3.5.1. Improve funding procedures for scientific and artistic research

- 3.5.2. Financial support with scientific research grants for traveling abroad (academic staff and students)
- 3.5.3. Financial support of participants in research and artistic projects with international partners.
- 3.5.4. Support with funding for publishing university textbooks and scientific and artistic works
- 3.5.5. Financial support of staff and students with electronic equipment
- 3.5.6. Music studio financial support with accompanying equipment and digital lounge

#### **4. Monitoring and Evaluation Analyses**

In the UHZ Research Strategy it is essential to track progress and monitor each program, project and activity planned, thus eventual corrections such as revision to point the system in the right direction should be central to evidence-based program design and responsible for cases where the system is not functioning as expected.

Understanding the monitoring and evaluation process is essential to improving our strategy. A detailed monitoring and evaluation plan is needed to serve as a functional structure intended to monitor and review key areas, projects, initiatives and plans identified in the Research Strategy.

Such a plan will be developed in consultation with key stakeholders and is needed, inter alia, to identify the results achieved, to enable monitoring of progress towards strategy goals and requirements for financing the reviewed activities.

The monitoring and evaluation plan will be flexible and reasonable, and will continually serve to redefine, revise, and improve the priorities and objectives of the Research Strategy.

We have identified a series of indicators to evaluate overall performance progress and achievement. Afterwards, we will develop a clear evaluation implementation plan and a detailed monitoring framework to measure the progress of our strategy. In particular, we will define performance measures with the strategic goals outlined in this strategy.

##### **4.1. Performance Measurement**

- Increase the number of staff engaged in scientific research in all target areas by 30% from the current level.
- Increase the number of research publications by 30% from current levels in international journals.
- Create and functionalize 3 research institutes.
- Start of doctoral program and enrollment of 9 students.
- Increase the number of graduates in Masters level by 30% from the current level.
- Increase the percentage of academic staff with PhD degrees to 50%.
- Increase the number of students estimated at 30% from the current level.
- Increase the volume and value of research in cooperation with other international institutions by 30% from the current level.
- Improve UHZ ranking at national and international level - webometrics by 30% rate from current level.

## 4.2. Expected Results

Implementation of the UHZ Research Strategy will result in:

- Recognition as a distinguished University not only in studies but also in scientific research.
- All available resources will be aligned with our research strategy.
- Our multidisciplinary and cross-sectoral research and innovation at research institutes will be recognized for their relevance and impact.
- Our collaborations with foreign organizations will generate joint initiatives and strengthen research and enhance our research capabilities.
- The budget and support systems, and research infrastructure will help foster research and research excellence.
- Graduates of at UHZ will be well educated, prepared for diverse careers and based on global demand.
- Recognition of the knowledge gained in the international arena.
